

THE NEW CF
PURE EXCELLENCE

CF

DAF

The benchmark for
transport efficiency

A blue DAF CF truck is shown from the front-left corner, driving on a bridge. The bridge has a prominent metal railing with a repeating diamond or lattice pattern. The background is a clear, bright blue sky. The truck's front grille and headlights are visible on the left side of the frame.

THE NEW CF PURE EXCELLENCE

We have redeveloped the CF to make the best all-round truck on the road even better. Inspired by our DAF Transport Efficiency philosophy, The New CF goes beyond the class-leading reliability, versatility, efficiency and driver comfort of our Euro 6 trucks. So whether your needs are distribution, long-distance haulage, bulk or tank transport, The New CF sets new standards and delivers **Pure Excellence**.

DAF Transport Efficiency
drives Pure Excellence

The New CF delivers industry-leading fuel economy. Higher torque at lower revs combined with optimised drivelines, new high-efficiency rear axles, enhanced electronics and aerodynamic improvements result in **increased fuel efficiency of up to 7%** for long haul journeys. Fuel savings that help reduce your total cost of ownership.

Higher payloads

The New CF is lighter than before allowing higher payloads that contribute towards your profitability. A new, highly efficient yet ultra-compact Emission Aftertreatment System (EAS) saves 50 kg in weight. Redesigned engines and chassis optimisations also contribute to further weight savings. Depending on axle configuration, these improvements can lower vehicle weight by up to 100 kg. The New CF can take more load, invaluable in applications like distribution where every kilogramme counts.

Maximum uptime

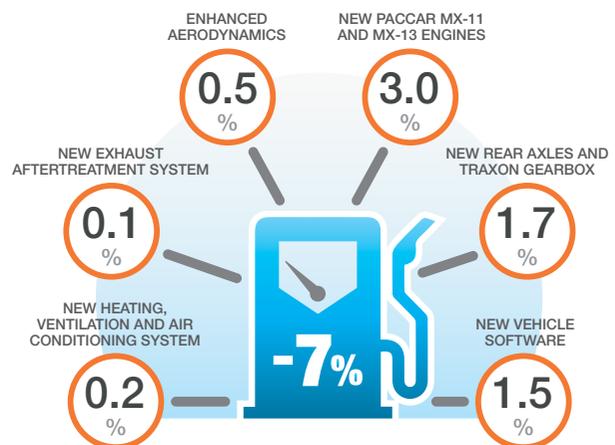

The CF is already renowned for its high reliability. The new electrical and electronic architecture improves this performance even further. Wiring and connections have all been improved and simplified for the highest reliability and excellent flexibility when it comes to adding auxiliaries. The result is maximum vehicle availability and lower operating costs. Service intervals increase to no less than 200,000 kilometres!

Superb driver comfort

The New CF includes features that make the cab an even more attractive and comfortable place to work, live and sleep. There are new options allowing you to personalise the interior. We have also introduced numerous innovations that make driving easier, safer and more enjoyable than ever.

Market-leading fleet management

Our new DAF Connect fleet management system gives you real-time insight into driver and vehicle efficiency. The innovative DAF Connect system provides clear information on vehicle location, fuel consumption, mileage, fleet utilisation and idle time. It provides comprehensive reports that enable you to compare vehicles and drivers. By optimising vehicle availability, reducing operational costs and enhancing logistical efficiency, DAF Connect maximises your profitability per kilometre.

The most versatile and stylish truck

The New CF is not only the industry's most versatile truck, it is also a great looking truck both inside and out. New exterior features and the new interior design make it the most appealing, comfortable and enjoyable vehicle to drive.

Attractive exterior design

The New CF's exterior includes leading-edge design features that put it in a class of its own when it comes to visual appeal.

NEW SUN VISOR

The sun visor has a new design to optimise aerodynamics and enhance fuel efficiency. It also includes a stylish aluminium-look element for great exterior appeal.

LOWER BUMPER INSERT

For a high-end look, the lower bumper has an aluminium-look accent.

PRACTICAL UPPER PANEL

There is a large panel above the DAF logo so you can add your company name.

REDESIGNED DAF LOGO

The DAF logo has been redesigned with chrome edges and an attractive aluminium look, symbolising the truck's quality.

SILVER GRILLE STRIPS

Silver grille strips give The New CF a strong, appealing and modern look.

The benchmark for driver comfort

The New CF interior has a high-end look and feel which is industry-leading. And because The New CF is the most versatile truck on the market, there are many options to customise the cab both to personal taste and transport needs.

Driver configurable switches

The clear and intuitive layout of the dashboard makes it easy to use. Thanks to smart vehicle electronics, individual switches can be positioned according to your transport requirements and the personal preference of the driver. These driver configurable switches also make it easy for dealers and bodybuilders to add new functions without the need to install extra control panels. So whatever the configuration of the body and chassis, The New CF allows you to control functions wherever you want on the dashboard. The perfect combination of great driver comfort and maximum vehicle efficiency.

High-comfort climate control

The completely new climate control unit stands out when it comes to comfort and user-friendliness. It features one-touch defrosting, park ventilation, park heating with timer, optional rest heat utilization and automatic air recirculation. The rear wall includes a temperature control unit which allows the driver to access the system from the comfort of his bed. In addition, the new temperature and climate control system is extremely efficient, supporting lowest total cost of ownership. Maximum comfort and a cosy interior no matter what the weather conditions are.

Great-looking trim

The dashboard comes in Dark Sand trim with Black Rock deco panels as standard. The deco panels also come in the colours Rustica (wood structure) and Argenta (silver). It all adds up to an ultra-modern look.

Exclusive line upgrade

The interior can be upgraded with superb Exclusive trim on the dashboard and doors. The result is an extremely luxurious, six-star working and living environment for the driver.

New outstanding interior lighting

We have completely redesigned the interior lighting with an innovative rotary switch control. The control button is centrally located in the middle of the console so it is within easy reach. The driver can choose a lighting mode for different driving and resting conditions, and there is also a dimming function.

Even better driver information

The beautiful and clear instrument panel has new fonts and a new styling for enhanced clarity. The Driver Information Panel provides more information to increase driver comfort and efficiency. To enhance driver performance even further, settings are grouped on the instrument panel more logically and the Driver Performance Assistant (DPA) includes even more tips for economical driving.

Interior makeover

The new interior does not only look good, it excels in comfort, with the added bonus of the ultra low noise levels. The dashboard comes in Dark Sand trim with Black Rock deco panels as standard. Deco panels come in the colours Rustica (wood structure) and Argenta (silver). The seats have a new trim and there are silver accents on the steering wheel. The walls, mattresses and curtains have new, warm colours for a high-class environment that makes every driver feel at home.

“ The perfect combination of great driver comfort and maximum vehicle efficiency. ”

THE NEW CF PURE EXCELLENCE

New standards
of versatility

Driveline excellence

Achieving up to 7% extra fuel efficiency and thus up to 7% lower CO₂ emissions starts by having the right driveline for the job. The New CF offers a range of new power ratings of the multi-torque PACCAR MX-11 and MX-13 engines. These power ratings result in even more torque at lower revs to allow down reving of the engine. Vehicles can now cruise with low engine revs at 900 rpm for highest efficiency, reliability, durability and extremely low noise levels. Additional torque is available in top gear for great driveability.

Engine innovations

For industry-leading fuel economy and excellent performance, the state-of-the-art PACCAR MX-11 and MX-13 engine feature valuable innovations. These include new highly efficient combustion and air management systems. Smart oil, steering and water pumps deliver their output matched to the exact demand of the engine, in every situation. That adds to overall vehicle efficiency!

New, high-efficiency rear-axes

As part of the all-new driveline, the CF features a new family of highly efficient rear axles with low-friction wheel ends. What's more, a range of faster ratios starting from 2.05:1 enable lower engine speeds for highest fuel efficiency.

High-performance gearboxes

As standard The New CF is equipped with an automated TraXon gearbox (12 and 16 speed), which is especially developed for operating at low engine speeds in all gears. Fast and smooth shifting support highest efficiency and comfort, and the transmission offers excellent manoeuvring characteristics at low speeds. In addition, the extended

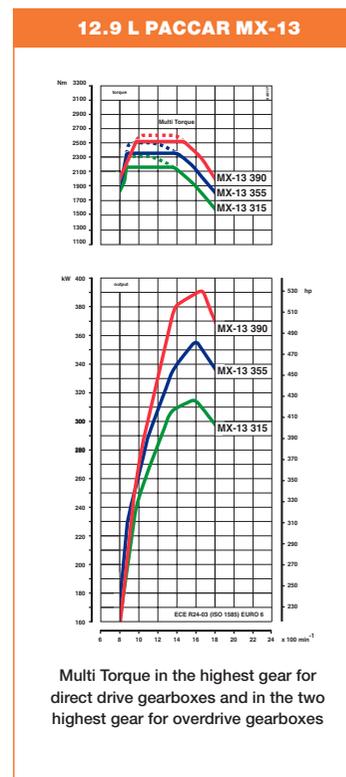

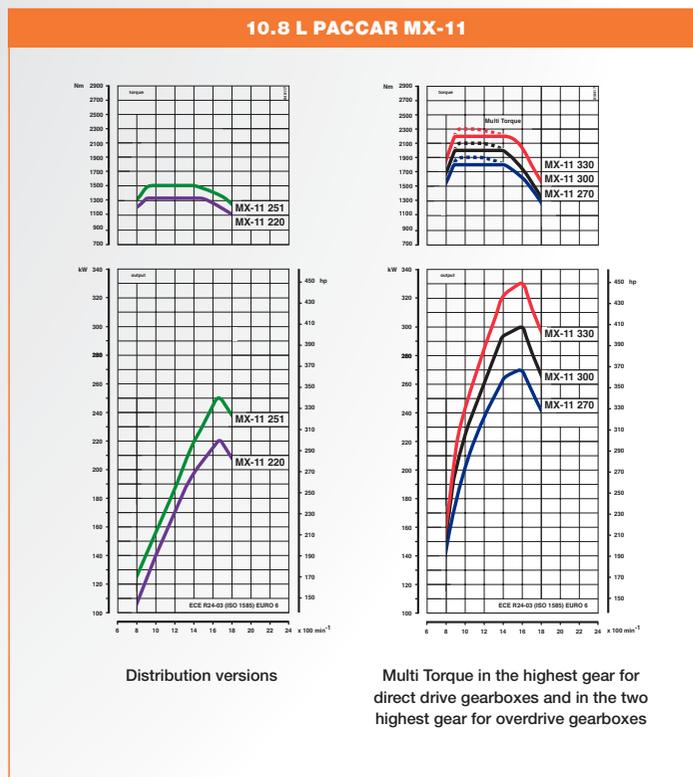

use of EcoRoll contributes to lowest fuel consumption. Customers are able to choose optional dedicated software settings from production for long haulage, liquid transport, on/off road applications, refuse collection or EcoCombi applications, allowing to adapt the shifting strategy to each and every application.

Extended EcoMode

To boost fuel efficiency, reduce emissions and lower operating costs, The New CF includes an extended set of Eco Mode options. The Eco Performance Mode ensures an optimal balance between superb driveability and economy. When fuel efficiency is paramount, the Eco Fuel Mode is the best option, with gear shifting at lower revs.

Low R&M

We have extended engine service intervals up to 200,000 kilometres. Newly introduced technology, such as the new driveshaft mounted clutch control unit, keeps wear and tear to a minimum. This adds up to the lowest total cost of ownership.

The perfect base to build on

Market-leading transport efficiency goes beyond an excellent driveline. It is also about weight savings and extra room for auxiliaries, which add to vehicle versatility and the most cost-effective operation. The New CF offers unmatched flexibility when it comes to chassis configurations, whether it is equipped with a hooklift system, flatbed, box body or any other superstructure.

Strong and light

Pure Excellence extends to The New CF's well-thought-out chassis. Made from high-quality steel, it is both light and strong.

- The Stabilink rear axle suspension ensures optimum roll stability, higher payloads and superb handling.
- Lower weight increases fuel savings and allows higher payloads for greater transport efficiency.

Easy fitting for any application

Components can be positioned to match your requirements perfectly. And thanks to the new ultra-compact EAS unit, which is 40% smaller than before, there is ample space for mounting pumps, crane leg supports or large fuel tanks.

- The highly flexible chassis layout allows almost endless variation when it comes to positioning components.
- The smart chassis layout enables fuel tank volumes of up to no less than 1,500 litres on tractors.

Bodybuilder-friendly

The New CF's versatility is further enhanced by an extensive Body Attachment Module (BAM) programme that bodybuilders will love. There are dedicated preparations for cranes up to 25 tonnes and for box bodies. In addition, new and extended hole patterns at the rear of the chassis, allow quick and optimal mounting of the superstructure.

- BAM programme enables faster bodybuilder throughput time and reduces build costs.
- Fast, easy positioning of rear under run protection, tippers, cranes and tail lifts.

ECAS air suspension

The Electronically Controlled Air Suspension (ECAS) has been completely renewed for class-leading comfort, functionality and reliability. The new system allows excellent pressure management of air bellows, guaranteeing the best possible vehicle stability, especially when loading and unloading. In addition, thanks to ultra-accurate measurement and compensation of axle load variances, overload of the axles can be prevented. The new control unit makes DAF's first class ECAS system extremely easy to operate.

- New ECAS offers class leading comfort, functionality and reliability
- Excellent vehicle stability under all circumstances, including loading and unloading
- Unequaled user-friendliness

Excellent safety and comfort

The New CF comes with enhanced features that not only ensure the highest possible safety of the driver and other road users, but also contribute to vehicle versatility, fuel efficiency and comfort, no matter what business segment you are in.

1. Predictive Cruise Control

Predictive Cruise Control (PCC) uses GPS technology to determine the exact location of the truck and the expected driving conditions for up to the next 2 kilometres. It uses this information to determine the ideal speed within a specified range. In The New CF, PCC is now easily accessible via switches on the steering wheel. With a mild uphill climb, the improved PCC delivers a more gradual torque increase and at the start of a downhill slope, torque reduces when acceleration is sufficient. Together with Predictive Shifting, PCC can reduce fuel consumption and CO₂ emissions by 3%.

2. Adaptive Cruise Control

Adaptive Cruise Control (ACC) automatically adjusts the truck's speed to maintain a safe distance from the vehicle ahead.

3. Forward Collision Warning

Forward Collision Warning (FCW) generates a warning sound and a visual alert on the instrument panel, urging the driver to take action in order to prevent a collision.

4. Advanced Emergency Braking System

The Advanced Emergency Braking System (AEBS) intervenes to slow the truck down in an emergency.

5. Lane Departure Warning System

The Lane Departure Warning System (LDWS) warns the driver if the vehicle begins to move out of the lane owing to driver error, drowsiness or distraction.

6. Vehicle Stability Control

The electronic braking system features improved Vehicle Stability Control (VSC) to prevent jack-knifing and overturning.

7. Silent version

The New CF with MX-11 engine is available in a Silent version that uses smart technologies like special engine software and an encapsulated gearbox to keep noise levels below 72 dB(A). Ideal for distribution in areas where evening, night-time or early morning noise restrictions apply.

DAF

CF
EURO

DAF Service Concept
A total transport solution

Pure Excellence in transport efficiency goes beyond the improved truck itself. DAF offers a total transport solution through a range of professional services that enable you to select the right vehicle, secure the financing, and maintain your fleet at peak efficiency.

DAF MultiSupport

This flexible repair and maintenance service gives you maximum assurance at a fixed price per kilometre. You determine the service level that best fits your requirements and then expand it when needed to include trailers and bodywork. Your DAF dealer takes maintenance planning and administration off your hands. As a result, you can focus on your core activities, sure in the knowledge that your fleet will always be in perfect condition.

PACCAR Financial

As DAF's in-house finance provider, PACCAR Financial has over 50 years of experience offering customised financial services for the transport sector. A unique understanding of your day-to-day business makes them your ideal partner. Their tailored financial solutions not only cover fleet financing, but also complete combinations including bodywork and trailers along with repair and maintenance options.

PACCAR Parts

As well as original DAF parts and PACCAR engine parts, PACCAR Parts supplies over 70,000 universal TRP Truck & Trailer parts for all makes of trucks and trailers, including workshop consumables. With distribution centres in the Netherlands, the UK, Russia, Hungary and Spain, PACCAR Parts deliver orders throughout Europe within 24 hours. What's more, delivery reliability is 99.98%, making PACCAR Parts the best in the industry. Max Card holders also benefit from special deals and discounts.

DAFaid

DAFaid is often copied but never equaled. No matter where you are in the UK, help is just a telephone call away. And when in Europe the DAF ITS service team assists you in fifteen different languages, 24 hours a day, 365 days a year. Our local technicians will do everything possible to get your truck back on the road fast.

DAF Dealer Network

With our extensive network of professional sales and service dealers, there's always a DAF representative nearby ready to give you expert service throughout the lifetime of your truck. Highly qualified DAF technicians have in-depth knowledge of your vehicle, ensuring fast, effective repair and maintenance, using original PACCAR, DAF and TRP parts. This guarantees maximum vehicle availability and a high residual value.

DAF Driver Academy

Drivers are indispensable when it comes to achieving the highest level of transport efficiency. DAF training courses help them reduce fuel consumption, anticipate better and improve road safety. In fact, drivers who complete our courses realise economy improvements of up to 10% as well as adopting a safer and more relaxed driving style.

DAF Connect

In our drive for transport efficiency, the new DAF Connect fleet management system gives you a real-time insight into the performance of your trucks and drivers. A customisable, user-friendly on-line dashboard presents clear information on vehicle location, fuel consumption, mileage, fleet utilisation and idle time. It also provides comprehensive fuel reports with current and historical data enabling you to compare vehicles and drivers. The Live Fleet View feature gives the precise truck location enabling simple fleet planning showing distances, routes and driving time. You can also receive self-defined alerts when deviations occur in parameters like speed, route, location and fuel consumption so you can take immediate action. By optimising vehicle availability, reducing operational cost and enhancing logistical efficiency, DAF Connect maximises your profitability per kilometre.
